How Forex Trading Works

A. Currency Pairs :
Forex involves buying one currency while selling another (e.g., EUR/USD).

B. Price Fluctuations:
Values change due to supply and demand, news, interest rates, and global events.

C. Profit Strategy:
Traders predict if a currency will rise or fall to make a profit.

D. Example :
If the euro is expected to rise against the dollar, traders buy EUR/USD and sell later at a higher price.

E. 24-Hour Market:
Operates 24 hours a day through global financial hubs like London, New York, and Tokyo.

ZYNORAFX — Precision. Performance. Prosperity.

Why Do Traders Fail

Emotional Trading
» Desperation, fear, and greed
» lead to irrational decisions

Lack of Strategy
» Trading without a solid, tested strategy

Poor Risk Management
» Traders risk too much on each trade,
» leading to severe losses

Neglecting Education
» Some traders fail to research, learn,
» or keep up with changing market conditions.

No Plan. No Discipline. No Success.
